

FUJITSU BATTERIES 2014/2015

The world's largest manufacturer of NiMH-Batteries

FDK is the only Japanese manufacturer that both design and operate fully automatic production lines for batteries. Regarding FDK's alkaline batteries, in particular, which feature the world's top level of performance, not only the batteries but also the facilities that manufacture them have been acknowledged for their high quality around the world.

The Company offers alkaline batteries, lithium batteries and nickel-metal hydride batteries which can be used with repeated charging.

Founded in 1950, FDK started from the manufacture and sales of manganese dry batteries. Since then, the Company have made various experiments on the battery materials and then entered the ferrite business taking advantage of its expertise in the battery materials.

FDK is working on the research and development of the battery materials. These batteries are used in many life scenes from industrials' and commercials'. The Company engages in the areas of development and manufacturing of lithium ion capacitor and power storage system which combines the battery and electronic circuits.

Now, FDK products are used by customers in the various fields such as lighting equipment, computer, smart phone, communication equipment and automotive applications.

FUJITSU THE RANGE

RECHARGEABLES

Pre Charged Ni-MH

The comfortable ready to use rechargeable for up to 2100 rechargings

High Capacity Ni-MH

The eco friendly Powerpack

ALKALINE

Alkaline G

The classic Alkaline Power

Alkaline G Plus

For maximum Alkaline Power

ZINC-CARBON

General Purpose

The Economic battery for standard application

Heavy Duty

Maximum reliability for professional application

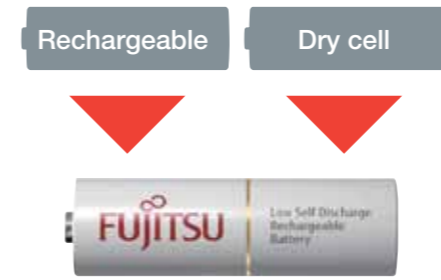

LITHIUM

Lithium Photo / Lithium Coin

Batteries for specific requirements

RECHARGEABLE BATTERIES

The merger of benefits

Fujitsu Rechargeables combine the eco-friendly aspects of rechargeables with the benefits of dry cell batteries:

- Rechargeable
- Reuseable
- Recyclable
- +
- Ready to use
- Storable
- Minimum discharge

2100

2100 x rechargeable

With every Fujitsu Rechargeable you save at minimum 2,100 batteries.

- Less battery waste.
- Less pollution.

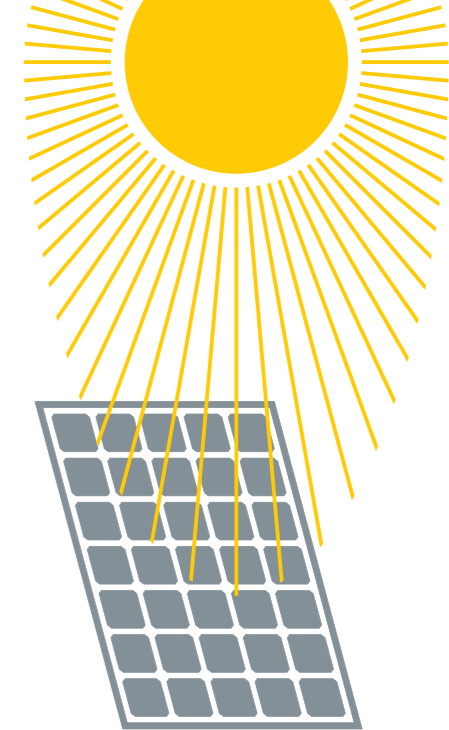

Non-ready to use rechargeables
0% after 2 years

Fujitsu rechargeables
70% after 5 years

Low self-discharge

After 5 years storage Fujitsu Rechargeables still have up to 70% of their charge. Standard rechargeables lose their entire charge within 2 years.

Always ready for action.

Eco precharged

Fujitsu Rechargeables are precharged with clean solar energy.

Eco-friendly from the beginning.
